They ensure that the XH A1S delivers the superb, high-quality High Definition video with vibrant color, crisp contrast and great detail - what you expect from Canon HD. The XH A1S also offers a full range of choices in selectable frame rates. You can choose between 60i, 30F progressive and 24F progressive settings to achieve just the look you want.

Canon U.S.A., Inc. | XH A1S

It turns out that the single most significant way to reduce CO2 emissions is to change the way we keep ourselves, and our food, cool. That's according to Project Drawdown, an organization working to identify, research and model the top solutions to climate change. But what makes cooling such a significant contributor to a warming planet?
