Note there is only one answer in this case. The "12.4" line only joins up one place. The other possible answer for L is  $149.9^\circ$ . But that is impossible because we already have  $M = 125^\circ$  and a triangle can't have two angles greater than  $90^\circ$ . Conclusion: When solving a "Side, Side, Angle" triangle we need to check if there could be another possible answer!

**Solving SSA Triangles - Maths Resources**

Trigonometry helps us find angles and distances, and is used a lot in science, engineering, video games, and more! Right-Angled Triangle. The triangle of most interest is the right-angled triangle. The right angle is shown by the little box in the corner:

Welcome to my math notes site. Contained in this site are the notes (free and downloadable) that I use to teach Algebra, Calculus (I, II and III) as well as Differential Equations at Lamar University. The notes contain the usual topics that are taught in those courses as well as a few extra topics that I decided to include just because I wanted to.
