How many stages are there in non-Hodgkin's lymphoma? - CNN.com

Pyloric stenosis, also known as infantile hypertrophic pyloric stenosis (IHPS), is the most common cause of intestinal obstruction in infancy. Pyloric stenosis is characterized by hypertrophy of the circular muscle fibers of the pylorus, with a severe narrowing of the lumen. The pylorus is thickened ...

Pyloric Stenosis Nursing Care Planning and Management

Helpful, trusted answers from doctors: Dr. Lin on sudden purple spots on skin: If this is a bruise which has occurred without obvious trauma, then you may need to be evaluated for possible bleeding disorder. Could there have been an insect bite? I would recommend seeing a physician if there is no improvement or if you start seeing other similar lesions.

Sudden purple spots on skin - Answers on HealthTap

Lymphedema is an abnormal collection of protein-rich fluid in the interstitium resulting from obstruction of lymphatic drainage. Lymphatic obstruction causes an increase in the protein content of the extravascular tissue, with subsequent retention of water and swelling of the soft tissue.

Insulin is a drug that is used to control glucose in patients with diabetes mellitus. It is the only parenteral antidiabetic agent available for exogenous replacement of low levels of insulin. Insulin is the hormone produced by the pancreatic beta cells of the islets of Langerhans. It is released into circulation when the levels of glucose around the cells arise.
