Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

A race is a grouping of humans based on shared physical or social qualities into categories generally viewed as distinct by society. First used to refer to speakers of a common language and then to denote national affiliations, by the 17th century the term race began to refer to physical (phenotypical) traits. Modern scholarship regards race as a social construct, an identity which is assigned ...

Classroom Lessons. Bug Blitz - A Study in Biodiversity (T. Tomm, Havana Junior High, Havana, IL) I n past years our district had money for field trips to local nature areas for the Butterfly Brigade project; however, budget cuts made it difficult to pay for transportation. I decided to adapt the project to a smaller level using our school garden, which is a quick walk to our front schoolyard!

Course Description: Students will explore two branches of biology: human anatomy and plant life. Students will learn about the body systems and conduct experiments...

Science — Biology - Easy Peasy All-in-One Homeschool

Created kinds are organisms that are defined by creation biology as sharing a common ancestry. The phrase refers to the Genesis account of the creation week during which God created many kinds of plants and animals. They are also referred to as "original kinds," "Genesis kinds," and more formally by creation scientists as baramin.
