Access Premium Content - ChE Plus . Included are 15 premium MS Excel spreadsheets, 26 premium article titles covering engineering data and maintenance, and equipment specification sheets in MS Excel format for 22 different types of equipment.

Chemical Engineering Resources - Cheresources.com - Index

A chemical plant is an industrial process plant that manufactures (or otherwise processes) chemicals, usually on a large scale. The general objective of a chemical plant is to create new material wealth via the chemical or biological transformation and or separation of materials. Chemical plants use specialized equipment, units, and technology in the manufacturing process.

An electrochemical cell is a device capable of either generating electrical energy from chemical reactions or using electrical energy to cause chemical reactions. The electrochemical cells which generate an electric current are called voltaic cells or galvanic cells and those that generate chemical reactions, via electrolysis for example, are called electrolytic cells.

Introduction . Often, chemical incidents are due to a loss of the reaction control, resulting in runaway process. Many of these incidents can be foreseen and avoided, if an appropriate analysis of thermal process data is performed in the proper way and in due time[1-9].
