The current model of atomic structure is the quantum mechanical model. Traditional chemistry starts with the study of elementary particles, atoms, molecules, substances, metals, crystals and other aggregates of matter. This matter can be studied in solid, liquid, or gas states, in isolation or in combination. The interactions, reactions and transformations that are studied in chemistry are ...

The following outline is provided as an overview of and topical guide to chemistry: . Chemistry – science of atomic matter (matter that is composed of chemical elements), especially its chemical reactions, but also including its properties, structure, composition, behavior, and changes as they relate the chemical reactions. Chemistry is centrally concerned with atoms and their interactions ...

The Biology covers the study of all the living beings and their interactions into the biosphere. This it is a very important task because we are able to know the behavior or functioning of each population when it faces to other individuals from other populations or communities and how the populations or the specific sectors of the biosphere are affected and/or benefited by that behavior or ...
