The complex conjugate of a complex number  $z=a+bi$  is defined to be  $\bar{z}=a-bi$ . (1) The conjugate matrix of a matrix  $A=(a_{ij})$  is the matrix obtained by replacing each element  $a_{ij}$  with its complex conjugate,  $\bar{A}=(\bar{a}_{ij})$  (Arfken 1985, p. 210). The complex conjugate is implemented in the Wolfram Language as `Conjugate[z]`. Note that there are several notations in common use for the complex ...

**Complex Conjugate -- from Wolfram MathWorld**

A complex number is a number that can be expressed in the form  $a + bi$ , where  $a$  and  $b$  are real numbers, and  $i$  is a solution of the equation  $x^2 = -1$ . Because no real number satisfies this equation,  $i$  is called an imaginary number. For the complex number  $a + bi$ ,  $a$  is called the real part, and  $b$  is called the imaginary part. Despite the historical nomenclature "imaginary", complex numbers are ...

Definition. The term problem solving means slightly different things depending on the discipline. For instance, it is a mental process in psychology and a computerized process in computer science. There are two different types of problems, ill-defined and well-defined: different approaches are used for each.

Welcome to my math notes site. Contained in this site are the notes (free and downloadable) that I use to teach Algebra, Calculus (I, II and III) as well as Differential Equations at Lamar University. The notes contain the usual topics that are taught in those courses as well as a few extra topics that I

decided to include just because I wanted to.
