Genetic engineering is a process that alters the genetic structure of an organism by either removing or introducing DNA. Unlike traditional animal and plant breeding, which involves doing multiple crosses and then selecting for the organism with the desired phenotype, genetic engineering takes the gene directly from one organism and inserts it in the other.

The title of this book, 9/11 Contradictions, refers entirely to internal contradictions within the public story about 9/11. The book deals, in other words, with issues on which one person, agency, institution, or official body that has helped articulate the public story about 9/11 has contradicted another such person, agency, institution, or official body.
