Your body is a brilliant machine with many important parts. Watch movies, read articles, and do
activities to find out more.

How the Body Works - KidsHealth

Epithelial tissue. There are four types of basic tissues in the body: Epithelial, Connective, Muscle
and Nervous tissue. Goblet cells are found in epithelial tissue of Gastrointestinal tract and
Respiratory tract. Following is a microscopic view and a diagram of epithelial tissue of the
respiratory tract showing goblet cells. This is a diagram of a goblet cell:

In what kind of tissue can goblet cells can be found ...

From the kidneys through the ureters to the bladder; from there through the urethra to be expelled
from the body. Urine is formed after a process of glomerular filtration in the kidneys. This urine is
then conducted through the ureters, twin muscular tubes that connect the kidneys to the bladder, a
storage chamber. The bladder is a muscular chamber that expands as urine fills it.

What is the path of urine through the urinary system ...

The lesson will begin with the teacher engaging the students with a presentation of "How the Blood
Gets Around the Body" following a think quest presentation that covers the parts and functions of
the circulatory system, including the brain, veins and arteries, heart and blood. Students will
explore blood vessels by watching a short video clip, conducting a hands-on investigation about
blood ...
