Exploration And Colonization Test Answers

European Colonization in Canada. Before the first Europeans set foot on the continent, Canada was home to the First Nations, which were independent groups with a huge variety of different ...

The Impact of European Exploration & Colonization on Canada

The physical exploration of the Moon began when Luna 2, a space probe launched by the Soviet Union, made an impact on the surface of the Moon on September 14, 1959. Prior to that the only available means of exploration had been observation from Earth. The invention of the optical telescope brought about the first leap in the quality of lunar observations.

Space colonization (also called space settlement, or extraterrestrial colonization) is permanent human habitation off the planet Earth.. Many arguments have been made for and against space colonization. The two most common in favor of colonization are survival of human civilization and the biosphere in the event of a planetary-scale disaster (natural or man-made), and the availability of ...

As an amusing side note, in a science essay called "The Sight Of Home" Isaac Asimov once calculated how far an interstellar colony would have to be from Terra before Sol was too dim to be seen in the colony's night sky with the naked eye. Turns out that colonies further than 20 parsecs (65 light-years) cannot see Mankind's Homestar, because Sol's apparent magnitude is dimmer than 6.

Science may well give us good things. We all know Velcro came from NASA. But why bother spending all this money exploring space and finding out there was water on Mars at some point in the last few thousand years (we have water in Earth) when these same great minds could be applied to finding better ways to power humanity's insatiable desire for energy, to feeding the starving millions around ...
