Scientific Sessions/Tracks. Track 1: Organic Chemistry All new ideas in the field of organic chemistry research are welcome to Chemistry World 2019, it's a pleasure for us to organize conference and provide platform for new researchers to discuss and network with experts. It is an excellent opportunity for academic as well as industrial chemists to collaborate and share their research.

Crystallography is a technique that characterizes the chemical structure of materials at the atomic level by analyzing the diffraction patterns of electromagnetic radiation or particles that have been deflected by atoms in the material. X-rays are most commonly used. From the raw data the relative placement of atoms in space may be determined.
