A unit test is not suited to cover the database connectivity. Instead, this is covered by integration tests. Assuming your class handling the JDBC has a method that returns a Connection, you can write a test for the connection not being null and isValid to submit queries and execute them. This is an example using Spring and JUnit 1 for this integration test:

In this chapter we discuss implications of new knowledge about learning for the design of learning environments, especially schools. Learning theory does not provide a simple recipe for designing effective learning environments; similarly, physics constrains but does not dictate how to build a bridge (e.g., Simon, 1969).
