A must-read for anyone who wants to participate in talk.origins. This article lays out the land for evolutionists and creationists alike, presenting the concepts of and the evidence for biological evolution.

Introduction to Evolutionary Biology - TalkOrigins Archive

In biology, taxonomy (from Ancient Greek τάξις (), meaning 'arrangement', and -νομία (), meaning 'method') is the science of naming, defining (circumscribing) and classifying groups of biological organisms on the basis of shared characteristics. Organisms are grouped together into taxa (singular: taxon) and these groups are given a taxonomic rank; groups of a given rank can be ...

Taxonomy (biology) - Wikipedia

In the 1920s and 1930s the so-called modern synthesis connected natural selection and population genetics, based on Mendelian inheritance, into a unified theory that applied generally to any branch of biology. The modern synthesis explained patterns observed across species in populations, through fossil transitions in palaeontology, and complex cellular mechanisms in developmental biology.

COLLEGE OF ARTS & SCIENCES BIOLOGY Detailed course offerings (Time Schedule) are available for. Spring Quarter 2019; Summer Quarter 2019; Autumn Quarter 2019

BIOLOGY - University of Washington

These are the lessons created so far for the 2016 GCSE Biology course. This section covers topics of trophic levels in an ecosystem, and food security. The lessons have very little worksheets to save on paper, and are very discussion lead. Feel free to us...

2016 AQA Biology GCSE Ecology 4.7.4 4.7.5 Trophic Levels ...

The Biology Added Value Unit assessment is an assignment. While describing what candidates must do, the published assessment offers considerable flexibility in the choice of a context for the assessment, in which candidates apply skills, knowledge and understanding to investigate a topical issue in biology and its impact on the environment and/or society.

Nymph Biology Mayfly nymphs or "naiads (Naiad: Naiad is the technical term for nymph used by modern entomologists.)" grow underwater for a period ranging from 3 months to 2 years, depending on the species. Like the stoneflies of Plecoptera, their development follows "incomplete" metamorphosis, meaning they do not undergo a dramatic transformation to adulthood via a pupal stage like butterflies ...

RIS Reporting - sdbor.edu

Evolution: Evolution, theory in biology postulating that the various types of plants, animals, and other living things on Earth have their origin in other preexisting types and that the distinguishable differences are due to modifications in successive generations. It is one of the keystones of modern biological theory.

Link to Departments website. The major in Accounting at UGA is designed to give students an understanding of the theory of accounting as it is used in our society: accounting standards, financial statement preparation, product costs, budgeting, taxation, auditing, risk assessment, and controls.

University of Georgia

Adaptation is the evolutionary process where an organism becomes better suited to its habitat. This process takes place over many generations. It is one of the basic phenomena of biology. When people speak about adaptation, they often mean a 'feature' (a trait) which helps an animal or plant survive. An example is the adaptation of horses' teeth to grinding grass.
