Environmental Ethics. The field of environmental ethics concerns human beings' ethical relationship with the natural environment. While numerous philosophers have written on this topic throughout history, environmental ethics only developed into a specific philosophical discipline in the 1970s. This emergence was no doubt due to the increasing awareness in the 1960s of the effects that ...

Sample proposals for the Writing Guidelines for Engineering and Science Students: guidelines to help students of science and engineering make their writing more efficient for others to read and to make the process of writing more efficient for them to perform.

### **Sample Proposals for the Undergraduate Engineering Review**

As shown in Table 1, the most-often used theories in the areas reviewed are SCT, the TTM/stages of change, the HBM, the TPB, and the PRECEDE/PROCEED planning model. These findings are similar to those in general reviews of the literature (above) and show that a small number of theories are being used to develop and test interventions.

### **The Role of Behavioral Science Theory in Development and ...**

To build a science of the person, the most basic question was, and remains, how can one identify and understand the psychological invariance that distinctively characterizes an individual and that underlies the variations in the thoughts, feelings, and actions that occur across contexts and over time?

Writing a list of references. At the end of all pieces of academic writing, you need a list of materials that you have used or referred to. This usually has a heading: references but may be bibliography or works cited depending on the conventions of the system you use. The object of your writing is for you to say something for yourself using the ideas of the subject, for you to present ideas you ...
