Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular ...

This article is based on our personal experience and is our personal perspective from our careers in a big pharma company. Some points made will be unique to GSK and to the UK and we recognise that drug discovery also takes place in biotechs, academia and in non-profit institutions inter alia and certain points will not apply in these situations. But we hope most points capture practices and ...
